Syrah, also known as Shiraz in Australia, is a red wine varietal produced all over the world. From its home in the Northern Rhone, to more modern interpretations throughout the New World, Syrah can range from medium bodied and nuanced to very full and jammy. The varietal is a favorite of sommeliers and pairs especially well with spiced meats, hard cheese and earthy mushrooms. Drink like a somm and enjoy these four excellent – and different! – examples of Syrah.
